This book contains over 300 questions, which include almost ALL of the possible questions from the actual test. Each question includes the correct answer as the DMV will have it on the test. The book explains the material in an easy to follow format. Most of the test is common sense, and after reading this book, you will understand it all. There are a few items you will need to memorize, and this book also includes a convenient list of those items, along with tips for studying. If you follow the instructions in this book, you WILL pass the test with a perfect score. Then you can start reading Kindle books on your smartphone, tablet, or computer no Kindle device required. I enjoy sandwiches 5.0 out of 5 stars This book is an excellent resource as far as strategizing and practice questions. I just got back from my exam and missed only one question you turn your wheels in the opposite direction of what you'd think on hills WITHOUT curbs, to allow your car to roll off the road in case the brakes fail. I would strongly recommend this in conjunction with the Most of the questions on the test are common sense ie. Yes,

literally that straightforward. But the ones that you will miss will be about the numbers namely speeds, distances, time, fines, and colors of curbs. These numbers can be frustrating, as many are somewhat arbitrary, but if you have these down pat it is unlikely you will have any difficulty with the exam.<http://doubleroptics.com/userfiles/digimate-dgl26-manual.xml>

The book includes a summary of these in chapter 25, which is the highest yield section of the book. As it was somewhat incomplete, I made a more detailed list while studying for the exam, which I included below

- Speed 1. 10 mph speed limit to pass parked bus or trolley at traffic light
- 15 mph speed limit in alleys, blind intersections.

Everyone knows blue and red. Use this list and the two books on Kindle and you should be golden. Good luck and happy driving. Also, it provides required distances for things like dimming your lights at night when approaching an oncoming vehicle or coming up behind a vehicle. First my husband bought and read this book, memorizing the questions that require it, and he got 100 on the test. Then I did the same and 100 again. Amazing!!! You must thoughtfully read the book and do the required Memory work and this book works like a charm!! And in some cases, the information is wrong since the law has changed!! Amazon should not be listing or selling this!! I was able to pass the test with a perfect score. I would recommend it to everyone! Recently had to take the mandatory age 70 written test. Aced it. It has helped thousands make 100% on their California Class C, Original and Renewal license, and on their Minors Permit test. Drivers applying for any type California driver license will find it helpful. <http://p1p1p1.ru/userfiles/digimaster-user-manual.xml>

Many called in by DMVs Safety Unit for reexamination have retained their license, or had it returned to them, after a careful study of this book. It will fully prepare you for Test Day at DMV tell you what to bring, what to do and what NOT to do what to say, and what Not to say in order to get along with the examiner. Its seven practice tests will help you learn the answers to any of DMVs several different tests. Its driving tips will help you drive like a pro on your behindthethe wheel test. Youll learn how to safely make right and left turns, back up straight, parallel park, do a 3point turn, park on hills and make safe, legal stops. It will teach you everything you need to know to pass your test with a high score, and with a minimum of discomfort. Its all here for you. The secrets to staying in the drivers seat for many years are shared with you by a former driver examiner, professional driving instructor and National Safety Council Defensive Driving Course Instructor. It is also available from amazon.com. I wrote this book hoping to help relieve some of the stress; and it does. I have hundreds of letters from people thanking me for writing it and telling me that they made a score of 100%. I also wrote the book to help you go safely there and come safely home. Learn the answers to the practice tests in this book and you will zip through DMVs written test. Dont sweat a behind the wheel driving test.

This book shows you, stepbystep, What to Do and What Not to Do, What to Say and What Not to Say; from the time you get in the car, until you jump out waving that piece of paper which says you passed. Make 100 percent on your test. Thousands have done it. ORIGINAL AND RENEWAL TESTS An original California Class C License test has 36 questions. A renewal test has 18 questions. The tests are revised every three months. This book will prepare you for any of the tests HOW LONG WILL THIS BOOK BE CURRENT. You should never discard a copy of California Drivers Test Made Easy. Most of the regulations in each edition have been current since the first edition of the book in 1981. It is only when a new law is passed that the book is revised. There have been very few changes since 1981. All of them are in this edition. DMVs DRIVER HANDBOOK, A MUST READ. California Drivers Test Made Easy will help you pass your written and driving tests, but to drive entirely within the laws of California you must also be familiar with the contents of DMVs California Drivers Handbook. It is available at any DMV Licensing Office. NOT ALL GOOD TEST DRIVERS ARE GOOD TEST TAKERS Many experienced drivers fail the written test, including drivers who have driven safely, and without citations, for many years. You may drive like a pro, but if you dont recognize in

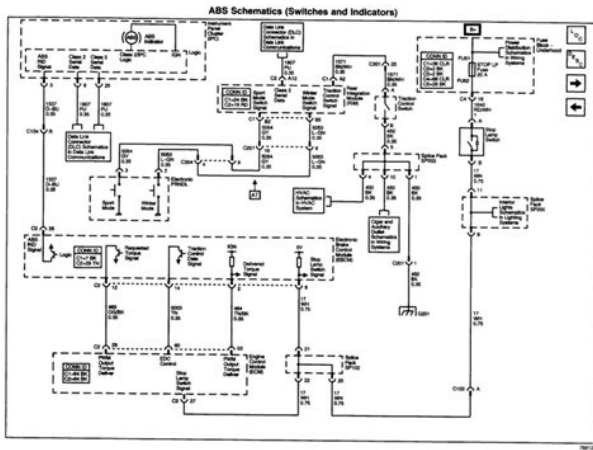

DMVs written tests the rules and regulations you follow that help you to be the good driver you are, you will have trouble passing your written test. The questions and answers in this book will take care of that. They are written in clear, concise and easy to understand language and describe exactly what it is that makes you a good driver. When you finish this book you should be a much better test taker, and possibly a better driver. If you are a seller for this product, would you like to suggest updates through seller support To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. 0 out of 5 stars Be advised much of the actual test question wording may be different than in the book, but the answers all matched those on my test. My biggest praise is toward the California DMV office in Hemet. It was our first visit to a CA DMV in about 15 years, and I would have rather gone to the dentist before. The new system was streamlined, and the office was very clean and organized, with friendly workers. We were in and out in 30 minutes. We filled out our apps. Our reason for the test is that we moved to Oklahoma for several years, and just moved back. NOTE Hemet uses large, easy to use touchscreens for the test, so its not easy to go back for unanswered questions. If you use an iPad or any touch screen computer youll have no problem. However it is a 2013 edition and was not up to date with some of the changes in the road rules and and some that were added between 2013 and 2017. This may have caused some people to get 4 or more questions wrong. I suggest that the author and publisher should work with the DMV to issue another edition the authors methods of teaching are excellent. Studied using the iPad. Took the test the first time, didnt pass. Found this book, good reviews. She used it to study before the second time. She also asked for a paper test the second time. The paper test was great; you can go back and change an answer; whereas in the electronic test you cannot go back to modify an answer, if you missed the maximum allowed, and you are so out of there. Beware the tricky wording on the DMV test. This manual gives you a heads up on that as well as reminding you of some fairly obscure rules of the road. GET THIS BOOK or take the train. I could produce this myself in a day if I had a copy of the CA DMV handbook available free online and at the DMV by the way. The test questions are worded so poorly they are either laughable, grammatically absurd or logically flawed. Many of the multiple choice questions have numerous correct answers.

<http://charlescarteronline.com/images/brizo-pascal-manual.pdf>

Absolutely full of mistakes. The practical advice is basic take a deep breath and dont make too much conversation with the examiner. Thanks amazing insights there. Reading the actual handbook did I mention thats free was infinity more valuable than reading this junk. There are also practice tests available free online, which read like they were written by adults and arent logically flawed. Alice updates her book constantly and this is really needed because the CA driving laws change all the time. Having scored well in the book tests gives you a really good level of confidence since practically 100% of the questions you will be asked are in the book. So when I decided to take a CA Motorcycle test last year which is a mix of regular driving test questions and motorcycle related questions I went back and obtained the latest copy of Alices book. Of course again, that was the right thing to do. Bottom line Alice book is a MUST for anyone that wants to take the CA Drivers test examination with the confidence needed to pass it. I highly recommend Alices book. I even believe in them so much that I give them out as gifts. Why Everyone has a fear alone of just going to the DMV. We also know that they so like to trick us with the wording of many of the questions. So the answers are right here in this latest edition. It is like a friendly cheat sheet. But also while you study from this book you see how important it is to truly know the latest changes to the driving codes and more. So for less than 20.00 you will become fearless and know that when you are in that line, you are the one with the advantage. Buy it today! Just as described, packed well and arrived early. This section asks whether an individual has had a condition within the last five years that affects his or her ability to operate a motor vehicle safely. One of the conditions specifically listed as part of this question is diabetes.The

licensing agency uses the information along with other nonmedical factors in reaching a licensing decision. Id. These staff have other responsibilities in addition to medical evaluation. A driver also may be required to undergo a medical evaluation if the licensing agency becomes aware that he or she has a medical condition that could impair his or her ability to drive safely. When the licensing agency becomes aware that a person has a medical condition that could impair safe driving performance, the agency will request medical information from that person and his or her physician through a medical evaluation form. An isolated episode whose cause is related to conditions that are unlikely to recur such as allergic reactions to insect bites or adverse reactions to medications will typically not result in any action. If the episodes are part of a chronic or recurring condition, the department evaluates the applicant based on the degree of control established after the episodes, and the probability that the individual will be able to maintain control of the condition in the future.

Generally individuals who have controlled their condition and been episode free for three to six months can receive a probationary license that requires regular monitoring by their physician and submission of followup medical reports to the licensing agency. When a driver has received notice of an action being taken against his or her license, the driver must request a hearing within 10 days of receiving personal service or 14 days from the date the notice was mailed or will lose the right to a hearing. Individuals have the right to be represented by an attorney at their own expense, to review and cross examine testimony of any witness for the licensing agency, present evidence and relevant witnesses, or testify on their own behalf. Medical Probation Type II is issued to a driver with three to five months control of his or her condition and requires the driver to submit a Driver Medical Evaluation DS 326 form, completed by a physician, to the licensing agency. The main factors to be considered in placing a driver on Medical Probation Type II include seizure type; seizure manifestations; seizure, medical, and lifestyle history; and the seizurefree period prior to the last episode. The factors to be considered in placing a driver on Medical Probation Type III are the same as in the case of Medical Probation Type II, but the licensing agency also considers more heavily the drivers established reliability and likelihood of complying honestly. Medical Probation Type III is not to be issued if a driver has exhibited noncompliance, withholding information from a physician or the agency, or inconsistent statements. No probation is required for drivers that have achieved six or more months of control and for whom there are no coexisting medication conditions that would aggravate the drivers seizures or impair his or her ability to safely operate a motor vehicle. This provision is imposed for three years, at which time a review is conducted.

Type II provisions are imposed when a driver has a history of difficulty in controlling a medical condition or when he or she has established control for only a short time. The driver is required to submit periodic reports from a physician to the agency. Typically, Type II with reporting does not extend beyond one year. If the driver has been compliant and has shown success in controlling the condition, then typically the reporting requirement is deleted, thus changing it to a Type I provision. Id. In California alone from 2006 to 2013 the state Department of Motor Vehicles DMV suspended over 4.2 million licenses due to unpaid court fines. Thousands more were suspended for various other reasons. When a person fails to prove they're a safe driver that can obey the rules of the road the state DMV or local court may issue a license suspension. The top reasons people get a license suspension in California include From the moment you get your license your drive record begins. Anytime you commit a trafficrelated offense points will be added to your record. The points stay on your record for a specified number of years and can add up. Accumulate too many points and you'll get slapped with a suspension. Another common issue is points being added for a traffic ticket that was dropped in court or dismissed because you completed traffic school. It's just one more reason to check your California driver record periodically. All driving privileges will be withdrawn for a specified period and you won't be able to legally operate any type of motor vehicle. The severity of the suspension will depend on the reason it was issued. Until you appear your license could be suspended as a way to motivate you to show up. The same applies for failure to pay a fine or child support payments. The suspension will go into effect 34 days from the date the order is received. For example, a DUI conviction comes with a sixmonth license suspension and the driver must enroll in a drivingundertheinfluence program. It's possible for most drivers to get their California driver license reinstated. The license reinstatement process varies depending on the reason for the suspension. Drivers should contact the CA DMV for guidance. However, you'll have to wait until the 30day mandatory suspension period has passed.

There are certain traffic rules you have to follow to ensure that everyone, including yourself, is safe and sound. You should take extreme caution when driving near pedestrians because unlike yourself, they do not have any safety systems to protect them in the case of a collision. The 2013 California permit test has a number of questions on sharing the road with pedestrians and that is why we wanted to go ahead and include couple of questions like that into our permit practice test CA knowledge exam. Remember that all sample questions on this practice permit test are based on the official California drivers handbook, you can always refer to the manual when searching for the correct answer. Make sure to read the book before you hit the DMV for your real permit test. Read on to find out which one of the answers is right. Answer B to the permit practice test CA sample question offers us to take the right of way. Remember that there is no traffic rule that says that the right of way must always be taken. Yes, the right of way gives you priority on the road, but you must still exercise it with caution when you see that it may lead to a traffic accident or place someone else in danger. Answer C to the California DMV practice permit test question tells us to proceed normally. While this looks reasonable at first, it is incorrect. Blind pedestrians cannot judge the situation in the same way as you do, which means that you have to be extra cautious when driving near them. Answer D to the California practice permit test question suggests that we need to drive away quickly. This is probably one of the worse things you can do, speeding when there is a blind person nearby.

The sound of the roaring motor while you are speeding away may scare the pedestrian or his guide dog into unpredictable actions, he may accidentally stumble onto the road and be hit by you or

another vehicle. Practice Test Answers. Here is what the official California drivers handbook says about such situations When driving near a blind pedestrian, slow down, always yield the rightofway and then proceed with caution. Be prepared to stop your vehicle in order to prevent injury or danger to the pedestrian. Make sure to follow this rule while driving on California roads.
